- Api/Backend development

LANGUAGES

PROFIL

I'm Pierre, fullstack developer specializing in creating scalable, efficient, and user-friendly digital solutions. With experience in software development, I offer expertise in developing and managing entire project, including front and backend on web and mobile.

EXPERIENCE

Crazy Web Studio | 2021 - 2024

Developed and maintained various websites and e-commerce platforms, primarily using WordPress/PHP and Shopify. Worked closely with designers and clients to deliver tailored solutions, ensuring optimal performance and functionality while adhering to best development practices.

- *Plugin Development*
- *Shopify Development*
- *Wordpress integration*
- *Custom PHP development*

FlaminGO! The Phuket App | 2023 - 2024

As the lead developer for FlaminGO!, I spearheaded the project to rebuild the mobile app from the ground up using Flutter/Dart technology, enabling the app to function seamlessly on both iOS and Android platforms.

- *Mobile Application Development*
- *Google Maps Integration*
- *Strapi Headless CMS, REST Api*
- *Firebase auth, firestore, edge functions...*

Be Fit For Life Limited | 2024 - Present

I lead the development of a fitness application in Bangkok, built from the ground up by our team. After a year of dedicated development, the app successfully launched and now serves 5,000+ daily users. I oversee and contribute to both backend and frontend teams, ensuring seamless functionality, guiding development best practices, and driving continuous improvements to optimize performance and user experience.

- *Project management*
- *Golang Api development*
- *Flutter front-end development*
- *In-app purchases, subscriptions*
